BoxElder Helicopter Systems

Our company was born out of the realization that the helicopter pilot community was under-represented and under served in every aspect of civil aviation. All major aviation stores both on and off-line only have a limited collection of random helicopter items at best. Most of the time we end up having to use accessories designed for fixed-wing aircraft and adapt them for our twirling birds. No more!

We are a team of helicopter pilots and aerospace engineers who put their minds and energy together to create a helicopter pilot paradise. We start small by producing our very own high quality accessory system, only for helicopters. All of our components are made with the absolute best materials for the application. Quality and functionality is paramount. Every part is individually designed for a particular helicopter and therefore there are no generic compromises of one size fits all.

We have not yet thought of everything. Of course not. That's why we are open to your calls, and ready to design anything you feel would advance the in-cockpit helicopter experience.

Our Logo

We are a green company that wants to be part of the universal helicopter flight ecosystem. Just like a BoxElder seed starts its life in flight, so does our company now in the aviation community!

BoxElder Bracket

The BoxElder helicopter system is designed entirely around this Main BoxElder Bracket. This high strength, UV resistant, light and durable component provides the base upon which all other

accessory attachments can be securely connected.

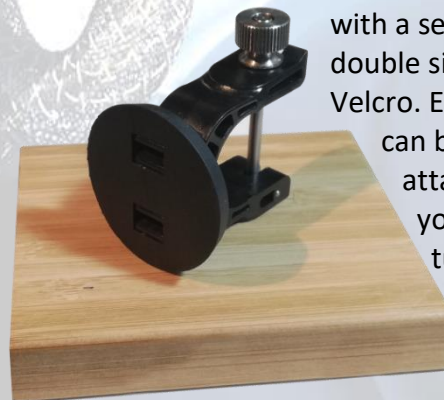

Universal Magnetic Attachment

Using this 360 degree swivel magnetic attachment, the pilot can mount any device to the cyclic-bar after attaching the included self-adhesive metallic disk to their device.

Universal Disk Attachment

This attachment comes with a self-adhesive double sided tape or Velcro. Either option can be used to attach the disk to your device and in turn the disk to the BoxElder Bracket.

Sporty's Aviation Timer Attachment

This attachment was designed

specifically to accommodate the popular Sporty's aviation timer, but many common timers will also fit.

GoPro Attachment

This is a standard GoPro camera attachment accessory that can be used with our BoxElder Bracket.

ASA Aviation Timer Attachment

Another popular aviation timer has made it into our custom designed products. This attachment preserves the original ability of the mounting clip to mount the timer at varying angles.
